

Value Lives with Improved Road Safety Performance with

ISO 39001

ROAD TRAFFIC SAFETY MANAGEMENT SYSTEMS

ISO 39001 Road Traffic Safety Management System provides a systematic tool for organisations to address road traffic safety risks and injuries that exist within the road network and in the workplace.

ISO 39001 aims to eliminate road fatalities and serious injuries arising from road traffic movements, and is applicable to all organizations of any size in public and private sector. The management system institutes periodic, quantitative targets to reduce deaths and serious injuries, as well as systematically address their cause factors. The road safety management system can be integrated with the general management system of an organisation and with several parallel management system standards such as ISO 9001 (Quality) and ISO 14001 (Environment). ISO certified organisations will see smooth integration of this road traffic safety component to their existing systems, and gain added benefits from the unique elements in ISO 39001 that are not covered by any other ISO management system standard.

ISO 39001 contributes to the UN's Sustainable Development Goals (SDGs), specifically:
 Goal 3: Good Health & Well Being
 Goal 11: Sustainable Cities & Communities
 Goal 12: Responsible Consumption & Production

An effective risk-based Road Traffic Safety Management System will:

- Reduce the risk of death and serious injuries due to traffic accidents through the continual monitoring of safety performance
- See reduced insurance premiums, repair costs and lost time injuries costs due to traffic accidents
- Demonstrate commitment and ensure compliance with applicable statutory and regulatory requirements such as the Road Transport Act 1987 (Act 333)
- Increase organisational efficiency, effectiveness and profitability through continual process improvements
- Enhance corporate image and branding, and improve access to global markets

NIOSH Cert aims to create impact

collaboratively

NIOSH CERTIFICATION SDN. BHD. (NIOSH Cert) is a leading national certification body and a wholly owned subsidiary of the National Institute of Occupational Safety and Health (NIOSH), and the Ministry of Human Resources, Malaysia.

We have a proven track record of delivering reliable and comprehensive assessments, in conformance with the relevant international standards, codes of practices, guidelines and rules and regulations.

Since 2004, NIOSH Cert has been a collaboratively partner in the ISO Certification journeys of Malaysia's most successful companies, government bodies, higher learning institutions and SMEs. We have helped clients create impact and give value to the world's communities through providing internationally-recognised certification services.

It is our passion and privilege to be the trusted, reliable and transparent partner in helping our clients increase the efficiency and effectiveness of their businesses operations. Testimony to NIOSH Cert's emphasis on customer satisfaction, our top 10 clients have been with us for an average of 10 years.

OUR COMMITMENT

NIOSH Cert's business practices are safe, responsible, impartial, and transparent in accordance with our Core Values and ISO 17021 Principles.
