NIOSH CERTIFICATION

Safeguard critical information assets with

ISO 27001

INFORMATION SECURITY MANAGEMENT SYSTEMS

ISO 27001 Information Security Management Systems is an international standard that helps organisations manage the security of their information assets. It details requirements for establishing, implementing, maintaining and continually improving an information security management system (ISMS).

The ISMS encompasses people, processes and information technology systems. In the context of this standard, the term information includes all forms of data, such as documents, messages, communications, conversations, recordings, and photographs.

ISO 27001 can be used by companies and organisations, of any size nature or sector.

An effective Information Security Management System will:

- Secure business continuity by protecting information which has now become your business' critical assets in terms of confidentiality, integrity and availability. The system will ensure that the right people, processes, procedures and technologies are in place to protect information assets.
- Facilitate compliance with the Personal Data Protection Act 2010 and the Communication and Multimedia Act 1988 (MCMC).
- Enhance your business efficiency through savings due to lower occurrences of security incidents, where the cost of preventing a security incident is much lower than costs of the damage control and corrective actions post-incident.
- Increase organisational efficiency, effectiveness and profitability through continual process improvements.
- Enhance corporate image and branding, and improve access to global markets.

NIOSHCert aims to create impact
collaboratively

SCAN ME

NIOSH CERTIFICATION SDN. BHD. (NIOSHCert) is a leading national certification body and a wholly owned subsidiary of the National Institute of Occupational Safety and Health (NIOSH), and the Ministry of Human Resources, Malaysia.

We have a proven track record of delivering reliable and comprehensive assessments, in conformance with the relevant international standards, codes of practices, guidelines and rules and regulations.

Since 2004, NIOSHCert has been a collaboratively partner in the ISO Certification journeys of Malaysia's most successful companies, government bodies, higher learning institutions and SMEs. We have helped clients create impact and give value to the world's communities through providing internationally-recognised certification services.

It is our passion and privilege to be the trusted, reliable and transparent partner in helping our clients increase the efficiency and effectiveness of their businesses operations. Testimony to NIOSHCert's emphasis on customer satisfaction, our top 10 clients have been with us for an average of 10 years.
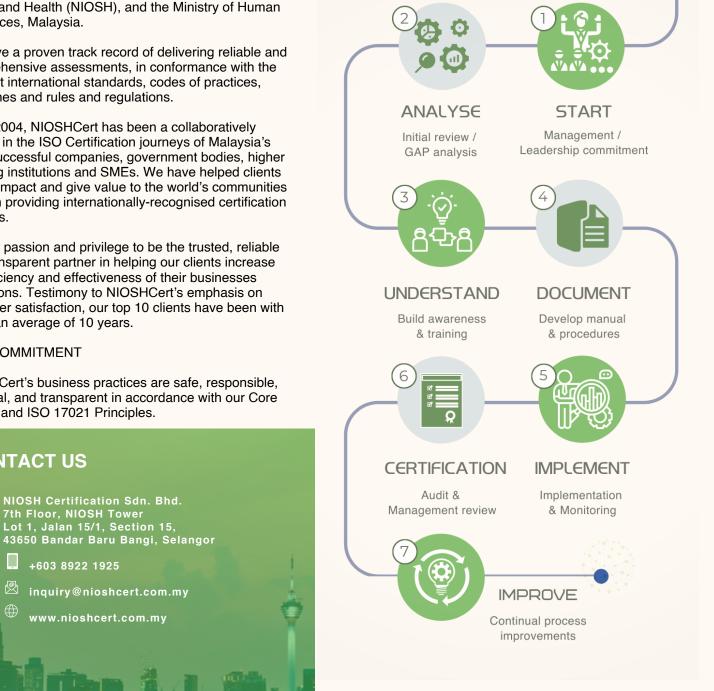

OUR COMMITMENT

NIOSHCert's business practices are safe, responsible, impartial, and transparent in accordance with our Core Values and ISO 17021 Principles.
