

Create Safer and Healthier Working Environments with

ISO 45001

OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEMS

ISO 45001 Occupational Health and Safety Management Systems is an internationally recognised standard used to improve employee safety, reduce workplace risks and create better, safer working conditions for management, employees and visitors. It gives guidance which enable organisations to put in place procedures and processes provide to prevent and/or reduce work-related injuries and illnesses. More importantly, the system proactively promotes continual improvements in occupational safety and health performance.

ISO 45001:2018 is applicable to any organisation that wishes to improve their workplace health and safety performance by establishing, implementing and maintaining an occupational health and safety management system. The system promotes the eliminating of hazards and minimising health and safety-related risks (including system deficiencies), as well as take advantage of occupational health and safety opportunities. The system also addresses occupational health and safety management system non-conformities associated with its activities.

ISO 45001 contributes to the UN's Sustainable Development Goals (SDGs), specifically:

- Goal 3: Good Health & Well Being
- Goal 5: Gender Equality
- Goal 8: Decent Work & Economy Growth
- Goal 9: Industry, Innovation & Infrastructure
- Goal 10: Reduce Inequality
- Goal 11: Sustainable Cities & Communities
- Goal 16: Peace, Justice & Strong Institutions

An effective risk-based Occupational Health and Safety Management System will:

- Ensure the safety, health and well-being of employees, business partners, and visitors to the workplace
- Reduce accident and incident rates by mitigating or eliminating workplace hazards, leading to cost savings from reduced lost time injuries and lower insurance costs
- Demonstrate commitment and ensure compliance with applicable statutory and regulatory requirements such as the Occupational Safety and Health Act 1994 (OSHA 1994) and Factory and Machine Act 1967 (FMA 1967)
- Increase organisational efficiency, effectiveness and profitability through continual process improvements
- Enhance corporate image and branding, and improve access to global markets

NIOSH Cert aims to create impact collaboratively

NIOSH CERTIFICATION SDN. BHD. (NIOSH Cert) is a leading national certification body and a wholly owned subsidiary of the National Institute of Occupational Safety and Health (NIOSH), and the Ministry of Human Resources, Malaysia.

We have a proven track record of delivering reliable and comprehensive assessments, in conformance with the relevant international standards, codes of practices, guidelines and rules and regulations.

Since 2004, NIOSH Cert has been a collaboratively partner in the ISO Certification journeys of Malaysia's most successful companies, government bodies, higher learning institutions and SMEs. We have helped clients create impact and give value to the world's communities through providing internationally-recognised certification services.

It is our passion and privilege to be the trusted, reliable and transparent partner in helping our clients increase the efficiency and effectiveness of their businesses operations. Testimony to NIOSH Cert's emphasis on customer satisfaction, our top 10 clients have been with us for an average of 10 years.

OUR COMMITMENT

NIOSH Cert's business practices are safe, responsible, impartial, and transparent in accordance with our Core Values and ISO 17021 Principles.
